DETAILED ACTION

1. The amendment filed 10/24/2005 has been placed of record in the file.
2. No claims have been amended.
3. Claims 1-28 are now pending.
4. The declaration filed on 10/24/2005 under 37 CFR 1.131 has been considered but is ineffective to overcome the Williamson et al. (U.S. Patent Number 6,915,519) reference. Thus, claims 1-28 remain rejected as presented in the previous action dated 7/20/2005.

Response to Declaration

5. The declaration filed 10/24/2005 is ineffective because the party making the declaration does not qualify as someone who may make a declaration under 37 CFR 1.131. Affidavits or declarations to overcome a rejection of claims must be made by the inventor or inventors of the subject matter of the rejected claims, a party qualified under 37 CFR 1.42, 1.43, or 1.47, or the assignee or other party in interest when it is not possible to produce the affidavit or declaration of the inventors. See MPEP 715.04.
6. Further it is noted that the declaration does not contain an allegation that the acts relied upon to establish the date prior to the reference or activity were carried out in this country or in a NAFTA country or WTO member country. See MPEP 715.07(c).
7. Even if the above requirements were met, the declaration would still be ineffective because the evidence submitted is insufficient to establish conception and is insufficient to establish reduction to practice as discussed below.

Art Unit: 2152

8. The evidence submitted is insufficient to establish a conception of the invention prior to the effective date of the Williamson et al. reference. While conception is the mental part of the inventive act, it must be capable of proof, such as by demonstrative evidence or by a complete disclosure to another. Conception is more than a vague idea of how to solve a problem. The requisite means themselves and their interaction must also be comprehended. See *Mergenthaler v. Scudder*, 1897 C.D. 724, 81 O.G. 1417 (D.C. Cir. 1897).

9. The applicant is required to give a clear explanation of the exhibits pointing out exactly what facts are established and relied on. See MPEP 715.07. In the present declaration, the applicant sets forth "Exhibit A" in order to show conception of the invention as claimed, but the declaration does not describe where in the exhibit the recited limitations are found. It is recommended that in discussing the exhibit in terms of conception the applicant provide some mapping or direction as to where in the exhibit the claimed limitations are found. Currently, the claim limitations cannot be clearly identified in Exhibit A and thus conception cannot be established.

10. The evidence submitted is insufficient to establish a reduction to practice of the invention prior to the effective date of the Williamson et al. reference. Proof of actual reduction to practice requires a showing that the apparatus actually existed and worked for its intended purpose. Currently, proof of actual reduction to practice cannot be found in Exhibit A.

11. The applicant is directed to MPEP 715.07 and MPEP 2138.

Conclusion

12. **THIS ACTION IS MADE FINAL.** The applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
